At the visual analysis, the colour is a clear and transparent golden yellow.

At the olfactory analysis, the perfumes, which compose the olfactory bouquet, are all clear, neat and limpid. We can identify the mango, the banana, the vanilla, the fresh grass and the sunflower.

At the gustative exam, the alcohol note is strong with a relative crisping sensation in the dorsal part of the tongue; there is some salivation in the lateral zones of the mouth and at the end a flavour of white wood is coming out.

At the retro-olfactory analysis, the heating sensation justified for the alcoholic percentage of the spirit is really soft and let a significant space to a new flavour as a white pepper; this tequila is really a surprise with odours and sensations which change and evolve at every single analysis. The gustative aromatic persistence is about 23/24 seconds.

MY PERSONAL OPINION: a tequila which could be an excellent digestive after a generous and spicy Mexican food.
